

1992 Year-End Index, Volumes 102-107

absolute age *see also* geochronology; isotopes

absolute age—applications

sedimentation rates: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97

absolute age—dates

aragonite: Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary foreslopes in the Bahamas

(Grammer, G. Michael, *et al.*) 103(1-3): 125-136

foraminifers: The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation

(Mienert, Jurgen, *et al.*) 106(3-4): 217-238

marine sediments: Mineralogical, K-Ar and ⁸⁷Sr/⁸⁶Sr isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean

(Huon, Sylvain, *et al.*) 107(4): 275-282

sediments: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic

(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101

shells: The development of a chenier sequence on the Victoria Delta, Joseph Bonaparte Gulf, northern Australia

(Lees, Brian G.) 103(1-3): 215-224

— The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores

(Svendsen, John Inge, *et al.*) 104(1-4): 1-17

acoustical surveys *see under* geophysical surveys *under* Antarctic Ocean; Arctic Ocean; Argentina; Atlantic Ocean; Mediterranean Sea; Pacific Ocean; Spitsbergen

Adriatic Sea—oceanography

sedimentation: Sedimentation of riverborne material in a shallow shelf sea; Adige River, Adriatic Sea

(Boldrin, A., *et al.*) 103(1-3): 473-485

Aegean Sea—oceanography

ocean floors: Recent gravitative mass movements in a highly tectonically active arc system; the Hellenic Arc

(Ferentinos, George) 104(1-4): 93-107

aeromagnetic surveys *see* magnetic surveys *under* geophysical surveys *under* Spitsbergen

Africa *see also* Egypt; Gabon; Guinea; Namibia

Africa—oceanography

continental margin: Hypsometry of divergent and translation- al continental margins of Southern Africa

(Emery, K. O., *et al.*) 106(1-2): 89-105

Alabama—oceanography

sedimentation: Multiple sediment sources and a cellular, non- integrated, longshore drift system; Northwest Florida and Southeast Alabama coast, USA

(Stone, Gregory W., *et al.*) 105(1-4): 141-154

algal flora—biostratigraphy

Quaternary: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

algal flora—diatom flora

Holocene: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event

(Schimmelmänn, A., *et al.*) 106(3-4): 279-299

Quaternary: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru

(Schrader, Hans) 107(4): 239-248

— Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea

(Pudsey, Carol J.) 107(1-2): 9-33

algal flora—nannofossils

Neogene: Paleontological evidence for early exposure of deep oceanic crust on the Vema fracture zone southern wall (Atlantic Ocean, 10°45'N)

(Aubry, Marie-Pierre, *et al.*) 107(1-2): 1-7

algal flora—paleoecology

Quaternary: Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia

(Pujos, M., *et al.*) 104(1-4): 153-164

Alps *see also* the individual countries

Andes *see also* the individual countries

Antarctic Ocean—geophysical surveys

acoustical surveys: Reflector "Pc" a prominent feature in the Maud Rise sediment sequence (eastern Weddell Sea); occurrence, regional distribution and implications to silica diagenesis

(Bohrmann, Gerhard, *et al.*) 106(1-2): 69-87

seismic surveys: Cenozoic prograding sequences of the Antarctic continental margin; a record of glacio-eustatic and tectonic events

(Cooper, Alan K., *et al.*) 102(1-4): 175-213

Antarctic Ocean—oceanography

ocean circulation: Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea

(Pudsey, Carol J.) 107(1-2): 9-33

sediments: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical ap-

- proach
(Harden, S. L., *et al.*) 103(1-3): 69-97
- Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications
(Robert, Christian, *et al.*) 103(1-3): 99-110
- Significance of clay mineral assemblages in the Antarctic Ocean
(Ehrmann, Werner U., *et al.*) 107(4): 249-273
- Antarctic Ocean—stratigraphy**
Pliocene: Reflector "Pc" a prominent feature in the Maud Rise sediment sequence (eastern Weddell Sea); occurrence, regional distribution and implications to silica diagenesis
(Bohrmann, Gerhard, *et al.*) 106(1-2): 69-87
- Quaternary*: Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea
(Pudsey, Carol J.) 107(1-2): 9-33
- Antarctica—geochronology**
Holocene: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97
- Antarctica—oceanography**
continental margin: Cenozoic prograding sequences of the Antarctic continental margin; a record of glacio-eustatic and tectonic events
(Cooper, Alan K., *et al.*) 102(1-4): 175-213
- continental shelf*: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97
- Antarctica—stratigraphy**
Cenozoic: Cenozoic prograding sequences of the Antarctic continental margin; a record of glacio-eustatic and tectonic events
(Cooper, Alan K., *et al.*) 102(1-4): 175-213
- Paleogene*: Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications
(Robert, Christian, *et al.*) 103(1-3): 99-110
- Appalachians** *see also* the individual states and provinces
- Arabian Gulf** *see* Persian Gulf
- Arabian Peninsula** *see also* Oman; Saudi Arabia
- Arabian Sea—geochemistry**
organic materials: A critical evaluation of depositional parameters controlling the variability of organic carbon in Arabian Sea sediments
(Paropkari, Anil L., *et al.*) 107(3): 213-226
- Arabian Sea—geophysical surveys**
seismic surveys: Deformation at plate boundaries around the Gulf of Oman
(Minshull, T. A., *et al.*) 104(1-4): 265-277
- Arabian Sea—oceanography**
ocean circulation: Deep currents in the Arabian Sea in 1987
(Warren, Bruce A., *et al.*) 104(1-4): 279-288
- The monsoon induced upwelling system of the southern coast of Oman
(Savidge, G., *et al.*) 104(1-4): 290-291
- ocean floors*: Deformation at plate boundaries around the Gulf of Oman
(Minshull, T. A., *et al.*) 104(1-4): 265-277
- Possible microbial origin of phosphorites on Error Seamount, northwestern Arabian Sea
(Purnachandra Rao, V., *et al.*) 106(1-2): 149-164
- sedimentation*: A note on the factors controlling the sedimentation rate along the western continental shelf of India
(Manjunatha, B. R., *et al.*) 104(1-4): 219-224
- Arabian Sea—sedimentary petrology**
sedimentary rocks: Possible microbial origin of phosphorites on Error Seamount, northwestern Arabian Sea
(Purnachandra Rao, V., *et al.*) 106(1-2): 149-164
- Arabian Sea—tectonophysics**
plate tectonics: Deformation at plate boundaries around the Gulf of Oman
(Minshull, T. A., *et al.*) 104(1-4): 265-277
- Arctic Ocean—geomorphology**
glacial geology: Glacial geology of outer Bjornoyrenna, southwestern Barents Sea
(Saettem, J., *et al.*) 103(1-3): 15-51
- Arctic Ocean—geophysical surveys**
acoustical surveys: The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores
(Svendsen, John Inge, *et al.*) 104(1-4): 1-17
- Arctic Ocean—oceanography**
ocean circulation: The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation
(Mienert, Jurgen, *et al.*) 106(3-4): 217-238
- ocean waves*: Model simulations of tsunamis generated by the Storegga slides
(Harbitz, C. B.) 105(1-4): 1-21
- sedimentation*: Accumulation rates of surface sediments in the Norwegian-Greenland Sea
(Paetsch, H., *et al.*) 104(1-4): 19-30
- Arctic Ocean—petrology**
metamorphic rocks: Petrology and geochemistry of a dredged clinopyroxenite-dolerite basal complex from the Jan Mayen volcanic province, Norwegian-Greenland Sea
(Bailey, J. C., *et al.*) 105(1-4): 63-76
- Arctic Ocean—tectonophysics**
plate tectonics: Magmatic-tectonic evolution of a volcanic rifted margin
(Eldholm, Olav) 102(1-4): 43-61
- Arctic region** *see also* the individual countries; Greenland; Spitsbergen
- Argentina—geophysical surveys**
acoustical surveys: Largo Bank; a shoreface-connected linear shoal at the Bahia Blanca Estuary entrance, Argentina
(Gomez, Eduardo A., *et al.*) 104(1-4): 193-204
- Argentina—oceanography**
continental shelf: Largo Bank; a shoreface-connected linear shoal at the Bahia Blanca Estuary entrance, Argentina
(Gomez, Eduardo A., *et al.*) 104(1-4): 193-204
- estuaries*: Largo Bank; a shoreface-connected linear shoal at the Bahia Blanca Estuary entrance, Argentina
(Gomez, Eduardo A., *et al.*) 104(1-4): 193-204

Argentina—stratigraphy

Holocene: Mass mortality of a Holocene *Tagelus plebeius* (Mollusca, Bivalvia) population in the Bahia Blanca Estuary, Argentina

(Farinati, Ester A., *et al.*) 106(3-4): 301-308

Asia *see also* Himalayas; India; Indonesia; Japan; Korea; Nepal; Taiwan

Atlantic Ocean *see also* Baltic Sea; Caribbean Sea; Gulf of Mexico; North Sea

Atlantic Ocean—geophysical surveys

acoustical surveys: Coast-parallel palaeochannels off southern Namibia

(Day, Richard W., *et al.*) 105(1-4): 299-304

— Erratum; Parasound echosounding; comparison of analogue and digital echosounder records and physical properties of sediments from the equatorial South Atlantic

(Rostek, Frauke, *et al.*) 103(1-3): 541-542

— The geomorphology of the Southwest Guinea margin; tectonic, volcanic, mass movement and bottom current influences

(Rossi, S., *et al.*) 105(1-4): 225-240

seismic surveys: Carbonate platforms along the Southeast Bahamas-Hispaniola collision zone

(Mullins, Henry T., *et al.*) 105(1-4): 169-209

— Paleogene-Neogene depositional history of the middle U.S. Atlantic continental rise; mixed turbidite and contourite depositional systems

(Locker, Stanley D., *et al.*) 103(1-3): 137-164

surveys: The bathymetry and distribution of the Bahia Seamounts, Brazil Basin

(Cherkis, N. Z., *et al.*) 103(1-3): 335-347

Atlantic Ocean—oceanography

marine geology: Marine particle size measurement with a stream-scanning laser system

(Jantschik, R., *et al.*) 106(3-4): 239-250

ocean circulation: Sediment flux patterns in the northeastern Atlantic; variability since the last interglacial

(Cremer, M., *et al.*) 104(1-4): 31-53

— The geomorphology of the Southwest Guinea margin; tectonic, volcanic, mass movement and bottom current influences

(Rossi, S., *et al.*) 105(1-4): 225-240

— The western Grand Banks of Newfoundland; transgressive Holocene sedimentation under the combined influence of waves and currents

(Dalrymple, Robert W., *et al.*) 105(1-4): 95-118

ocean floors: Carbonate platforms along the Southeast Bahamas-Hispaniola collision zone

(Mullins, Henry T., *et al.*) 105(1-4): 169-209

— The bathymetry and distribution of the Bahia Seamounts, Brazil Basin

(Cherkis, N. Z., *et al.*) 103(1-3): 335-347

ocean waves: Model simulations of tsunamis generated by the Storegga slides

(Harbitz, C. B.) 105(1-4): 1-21

sedimentation: Barriers, barrier platforms, and spillover deposits in St. George's Bay, Newfoundland; paraglacial sedimentation on the flanks of a deep coastal basin

(Shaw, John, *et al.*) 105(1-4): 119-140

— Episodic preservation of pteropod oozes in the deep Northeast Atlantic Ocean; climatic change and hydrother-

mal activity

(Melkert, Marian J., *et al.*) 103(1-3): 407-422

— Organic carbon distribution in the North Atlantic Ocean during the last glacial maximum

(Coppedge, Melissa L., *et al.*) 105(1-4): 37-50

sediments: Early diagenesis of marine organic matter; alteration of the carbon isotopic composition

(McArthur, J. M., *et al.*) 105(1-4): 51-61

— Late Cretaceous to Miocene phosphatic sediments in the Georges Bank basin, U.S. North Atlantic outer continental shelf

(Poppe, L. J., *et al.*) 107(4): 227-238

— Mineralogical, K-Ar and ⁸⁷Sr/⁸⁶Sr isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean

(Huon, Sylvain, *et al.*) 107(4): 275-282

— Mineralogy of the silt fraction in surficial sediments from the United States mid-Atlantic shelf, slope and rise

(Poppe, L. J., *et al.*) 103(1-3): 185-197

— Textural and dispersal patterns of thick mud turbidites from the Madeira abyssal plain

(Jones, K. P. N., *et al.*) 107(3): 149-173

— Thermoluminescence properties of a deglacial marine sequence from Cumberland Sound, Arctic Canada; sedimentologic and geochronologic implications

(Jennings, Anne E., *et al.*) 103(1-3): 111-123

Atlantic Ocean—stratigraphy

Jurassic: Rise and demise of the Bahama-Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway

(Poag, C. Wylie) 102(1-4): 63-130

Neogene: Paleontological evidence for early exposure of deep oceanic crust on the Vema fracture zone southern wall

(Atlantic Ocean, 10°45'N)

(Aubry, Marie-Pierre, *et al.*) 107(1-2): 1-7

Quaternary: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

Tertiary: Paleogene-Neogene depositional history of the middle U.S. Atlantic continental rise; mixed turbidite and contourite depositional systems

(Locker, Stanley D., *et al.*) 103(1-3): 137-164

Atlantic Ocean—tectonophysics

plate tectonics: Dynamic modeling of divergent margin formation; application to the U.S. Atlantic margin

(Sawyer, Dale S., *et al.*) 102(1-4): 29-42

Atlantic region *see also* the individual countries

atmosphere—geochemistry

carbon dioxide: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru

(Schrader, Hans) 107(4): 239-248

atolls *see* reefs *under* environment *under* diagenesis; *see* reefs *under* oceanography *under* Jamaica

Australasia *see also* New Zealand

Australia *see also* New South Wales; Northern Territory; Queensland; Tasmania; Western Australia

automatic data processing *see* data processing

Bahamas—geochronology

- Quaternary: Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary fore-slopes in the Bahamas*
(Grammer, G. Michael, *et al.*) 103(1-3): 125-136

Bahamas—stratigraphy

- changes of level: Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary fore-slopes in the Bahamas*
(Grammer, G. Michael, *et al.*) 103(1-3): 125-136

Bahamas—tectonophysics

- plate tectonics: Carbonate platforms along the Southeast Bahamas-Hispaniola collision zone*
(Mullins, Henry T., *et al.*) 105(1-4): 169-209

Baltic region *see also* the individual countries; Baltic Sea**Baltic Sea—oceanography**

- marine geology: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic*
(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101

beaches *see under* shore features *under* geomorphology**Belgium—stratigraphy**

- changes of level: The morphology of the top-Tertiary erosion surface in the Belgian sector of the North Sea*
(Liu, A. C., *et al.*) 105(1-4): 275-284
- Neogene: The morphology of the top-Tertiary erosion surface in the Belgian sector of the North Sea*
(Liu, A. C., *et al.*) 105(1-4): 275-284

bibliography *see also under* stratigraphy *under* North America**book reviews—areal geology**

- title: Geological evolution of Antarctica [book review]*
(Harrington, H. J.) 106(1-2): 165-166

book reviews—geochemistry

- title: Aquatic chemical kinetics; reaction rates of processes in natural waters [book review]*
(Butler, J. N.) 103(1-3): 536-538

book reviews—geomorphology

- title: Coasts [book review]*
(Saville, Thorndike, Jr.) 103(1-3): 530-531

book reviews—geophysical methods

- title: The potential of deep seismic profiling for hydrocarbon exploration [book review]*
(Hurst, Andrew) 103(1-3): 531-532

book reviews—mineralogy

- title: Minerals and mineraloids in marine sediments; an optical identification guide [book review]*
(Glasby, G. P.) 103(1-3): 539

book reviews—oceanography

- title: Deep marine environments; clastic sedimentation and tectonics [book review]*
(Stow, D. A. V.) 103(1-3): 530
- Deep marine environments; clastic sedimentation and tectonics [book review]
(Kenyon, Neil) 104(1-4): 293-294
- Ocean circulation [book review]
(Olson, Donald B.) 103(1-3): 534
- Productivity of the ocean; present and past [book review]
(Eisma, D.) 103(1-3): 536
- Tracers in the oceans [book review]
(Walton, Alan) 103(1-3): 535-536

book reviews—sedimentary petrology

- title: Argillaceous rock atlas [book review]*
(Krinsley, David) 103(1-3): 533-534
- Carbonate diagenesis and porosity [book review]
(Wright, Paul) 106(1-2): 167-168
- Diagenesis [book review]
(Wright, V. Paul) 103(1-3): 532-533
- Evaporite sedimentology; importance in hydrocarbon accumulation [book review]
(Ricci Lucchi, F.) 103(1-3): 529-530

book reviews—stratigraphy

- title: Nannofossils and their applications [book review]*
(Hay, William W.) 106(1-2): 166-167
- Triassic-Jurassic rifting; continental breakup and the origin of the Atlantic Ocean and passive margins; Parts A and B [book review]
(Ager, Derek V.) 103(1-3): 538-539

California—oceanography

- marine geology: Contemporary sedimentary processes in the Monterey Canyon-Fan system*
(McHugh, Cecilia M., *et al.*) 107(1-2): 35-50

California—stratigraphy

- Holocene: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event*
(Schimmelmann, A., *et al.*) 106(3-4): 279-299

Canada *see also* Great Lakes; Newfoundland; Northwest Territories; Nova Scotia; Ontario**carbon—C-13/C-12**

- beachrock: Stable isotopic composition of carbonate-cemented Recent beachrock along the Mediterranean and the Red Sea coasts of Egypt*
(Holail, H., *et al.*) 106(1-2): 141-148

- carbonate sediments: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia*
(Prasada Rao, C., *et al.*) 103(1-3): 249-272

- Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268

- marine sediments: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach*
(Harden, S. L., *et al.*) 103(1-3): 69-97

- Early diagenesis of marine organic matter; alteration of the carbon isotopic composition
(McArthur, J. M., *et al.*) 105(1-4): 51-61

carbon—geochemistry

- marine sediments: A critical evaluation of depositional parameters controlling the variability of organic carbon in Arabian Sea sediments*
(Paropkari, Anil L., *et al.*) 107(3): 213-226

- Organic carbon accumulation in Bannock Basin; evaluating the role of productivity in the formation of eastern Mediterranean sapropels
(Howell, Michael W., *et al.*) 103(1-3): 461-471

- Organic carbon distribution in the North Atlantic Ocean during the last glacial maximum
(Coppedge, Melissa L., *et al.*) 105(1-4): 37-50

carbonate rocks *see under* sedimentary rocks

Caribbean region *see also* the individual countries

Caribbean Sea—oceanography

sedimentation: Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia
(Pujos, M., *et al.*) 104(1-4): 153-164

Carpathians *see also* the individual countries

Caspian Sea—oceanography

sedimentation: Sedimentation in the southern inland seas of the arid zone of the USSR
(Khrustalyov, Yu. P., *et al.*) 103(1-3): 503-512

Cenozoic *see also* Tertiary; *see also under* stratigraphy *under* Antarctica; Gulf of Mexico

Cenozoic—tectonophysics

crust: Evolution of Mesozoic and Cenozoic continental margins
(Meyer, Audrey W., *et al.*) 102(1-4): 1-361

cesium— isotopes

Cs-137: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97

— Recent environmental changes recorded in anoxic Barnesfjord sediments; western Norway
(Paetzel, Matthias, *et al.*) 105(1-4): 23-36

changes of level *see also under* geomorphology *under* Delaware; Denmark; Jamaica; Netherlands; Newfoundland; Queensland; *see also under* stratigraphy *under* Bahamas; Belgium; Colombia; Gulf Coastal Plain; Italy; Newfoundland; Northwest Territories; Saudi Arabia; Turkey

China *see also* Shandong

clay *see under* sediments

clay mineralogy—areal studies

Antarctic Ocean: Significance of clay mineral assemblages in the Antarctic Ocean
(Ehrmann, Werner U., *et al.*) 107(4): 249-273

Atlantic Ocean: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

— Mineralogical, K-Ar and $^{87}\text{Sr}/^{86}\text{Sr}$ isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean

(Huon, Sylvain, *et al.*) 107(4): 275-282

— Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications

(Robert, Christian, *et al.*) 103(1-3): 99-110

England: Bulk properties of intertidal sediments in a muddy, macrotidal estuary

(Stephens, J. A., *et al.*) 103(1-3): 445-460

Indian Ocean: Clay mineralogy of Visakhapatnam shelf sediments, east coast of India [discussion and reply]

(Durga Prasada Rao, N. V. N., *et al.*) 105(1-4): 305-308

Yellow Sea: Origin and dispersal of Recent clay minerals in the Yellow Sea

(Park, Y. A., *et al.*) 104(1-4): 205-213

clay mineralogy—experimental studies

marine geology: Notes on the performance of an optical backscatter sensor for cohesive sediments

(Maa, Jerome P. Y., *et al.*) 104(1-4): 215-218

climate, ancient *see* paleoclimatology

Colombia—oceanography

continental shelf: Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia
(Pujos, M., *et al.*) 104(1-4): 153-164

Colombia—stratigraphy

changes of level: Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia
(Pujos, M., *et al.*) 104(1-4): 153-164

Colorado Plateau *see also* the individual states

Columbia Plateau *see also* the individual states

Commonwealth of Independent States *see* USSR

congresses *see* symposia

continental drift *see also* plate tectonics; *see also under* stratigraphy *under* Mesozoic; Paleozoic; Phanerozoic; Tertiary

continental drift—Gondwana

Africa: Hypsometry of divergent and translational continental margins of Southern Africa
(Emery, K. O., *et al.*) 106(1-2): 89-105

Western Australia: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas

(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

continental drift—Pangaea

regional: Pangaeian divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

continental margin *see also under* oceanography *under* Africa; Antarctica; Eastern U.S.; Greenland; Guinea; Gulf Coastal Plain; Israel; Italy; Western Australia

continental shelf *see also* marine geology; *see also under* oceanography *under* Antarctica; Argentina; Colombia; Denmark; Florida; India; Korea; Namibia; New England; Newfoundland; Northern Territory; Shandong; Spitsbergen; Turkey; Western Australia

continental slope *see also* marine geology; *see also under* oceanography *under* Gabon; Italy; Norway; Peru

crust *see also under* tectonophysics *under* Cenozoic; Mesozoic; New Zealand; Spitsbergen

crystal chemistry *see also* minerals

crystal growth *see also* minerals

crystal structure *see also* minerals

data processing—oceanography

ocean waves: Model simulations of tsunamis generated by the Storegga slides
(Harbitz, C. B.) 105(1-4): 1-21

Delaware—geomorphology

changes of level: Holocene depocenter migration and sediment accumulation in Delaware Bay; a submerging marginal marine sedimentary basin
(Fletcher, Charles H., III, *et al.*) 103(1-3): 165-183

Delaware—stratigraphy

Holocene: Holocene depocenter migration and sediment accumulation in Delaware Bay; a submerging marginal marine sedimentary basin
(Fletcher, Charles H., III, *et al.*) 103(1-3): 165-183

Denmark—geomorphology

changes of level: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic
(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101

Denmark—oceanography

- continental shelf*: Methane-derived carbonate cementation of marine sediments from the Kattegat, Denmark; geochemical and geological evidence
(Jorgensen, Niels Oluf) 103(1-3): 1-13

Denmark—stratigraphy

- Pleistocene*: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic
(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101

deposition of ores *see* mineral deposits, genesis

deuterium *see also* hydrogen

deuterium—geochemistry

- sea water*: Seawater circulation through the flank of the Florida Platform; evidence and implications
(Paull, C. K., *et al.*) 102(1-4): 265-279

diagenesis *see also* sedimentation

diagenesis—cementation

- carbonates*: Methane-derived carbonate cementation of marine sediments from the Kattegat, Denmark; geochemical and geological evidence
(Jorgensen, Niels Oluf) 103(1-3): 1-13
- geochemistry*: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272
- silica*: Reflector "Pc" a prominent feature in the Maud Rise sediment sequence (eastern Weddell Sea); occurrence, regional distribution and implications to silica diagenesis
(Bohrmann, Gerhard, *et al.*) 106(1-2): 69-87

diagenesis—dolomitization

- carbonate platforms*: Seawater circulation through the flank of the Florida Platform; evidence and implications
(Paull, C. K., *et al.*) 102(1-4): 265-279

diagenesis—environment

- deep-sea environment*: Indications of hydrothermal activity at the Chile Ridge spreading centre
(Marienfeld, P., *et al.*) 105(1-4): 241-252
- reefs*: Dynamic hydrology and diagenesis of a submerged Pleistocene fringing reef, Discovery Bay, Jamaica
(McCullough, M. L., *et al.*) 104(1-4): 139-151
- slope environment*: Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary fore-slopes in the Bahamas
(Grammer, G. Michael, *et al.*) 103(1-3): 125-136

diagenesis—experimental studies

- bioturbation*: Experimental evaluation of the influences of biogenic reworking on carbonate preservation in nearshore sediments
(Green, Mark A., *et al.*) 107(3): 175-181

diagenesis—geochemistry

- isotopes*: Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268
- organic materials*: Early diagenesis of marine organic matter; alteration of the carbon isotopic composition
(McArthur, J. M., *et al.*) 105(1-4): 51-61
- stable isotopes*: Stable isotopic composition of carbonate-cemented Recent beachrock along the Mediterranean and the Red Sea coasts of Egypt
(Holail, H., *et al.*) 106(1-2): 141-148

diagenesis—materials

- nodules*: Local variations in distribution and composition of ferromanganese nodules in the Clarion-Clipperton nodule province
(Skornyakova, N. S., *et al.*) 103(1-3): 381-405

diagenesis—processes

- phosphatization*: Late Cretaceous to Miocene phosphatic sediments in the Georges Bank basin, U.S. North Atlantic outer continental shelf
(Poppe, L. J., *et al.*) 107(4): 227-238
- Possible microbial origin of phosphorites on Error Seamount, northwestern Arabian Sea
(Purnachandra Rao, V., *et al.*) 106(1-2): 149-164

diatom flora *see under* algal flora

dolomitization *see under* diagenesis

Eastern Hemisphere *see also* Africa; Antarctic Ocean; Antarctica; Arctic Ocean; Atlantic Ocean; Indian Ocean; USSR

Eastern U.S. *see also* Delaware; Florida; New England

Eastern U.S.—oceanography

- continental margin*: Dynamic modeling of divergent margin formation; application to the U.S. Atlantic margin
(Sawyer, Dale S., *et al.*) 102(1-4): 29-42
- Rise and demise of the Bahama-Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway
(Poag, C. Wylie) 102(1-4): 63-130

ecology—observations

- deep-sea environment*: Seawater circulation through the flank of the Florida Platform; evidence and implications
(Paull, C. K., *et al.*) 102(1-4): 265-279

Egypt—sedimentary petrology

- diagenesis*: Stable isotopic composition of carbonate-cemented Recent beachrock along the Mediterranean and the Red Sea coasts of Egypt
(Holail, H., *et al.*) 106(1-2): 141-148

engineering geology *see also* slope stability; soil mechanics

England—oceanography

- estuaries*: Bulk properties of intertidal sediments in a muddy, macrotidal estuary
(Stephens, J. A., *et al.*) 103(1-3): 445-460
- sediments*: Source of sediment and sediment transport on the east coast of England; significant or coincidental phenomena?
(Chang, Shih-Chiao, *et al.*) 107(4): 283-288

environmental geology *see also* ecology

eruptive rocks *see* igneous rocks

Eurasia *see also* Caspian Sea

Europe *see also* Belgium; Denmark; England; France; Greece; Netherlands; Norway

experimental studies *see under* clay mineralogy; diagenesis

Far East *see also* the individual countries

faulting *see* faults

faults—distribution

- basement*: Preliminary interpretation of aeromagnetic data from Spitsbergen, Svalbard Archipelago (76°-79°N); implications for structure of the basement
(Skilbrei, Jan Reidar) 106(1-2): 53-68

fjords *see under* shore features *under* geomorphology

Florida—oceanography

continental shelf: Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf

(Locker, Stanley D., *et al.*) 104(1-4): 123-138

— Siliciclastic-to-carbonate transition on the inner shelf embayment, Southwest Florida

(Sussko, Roger J., *et al.*) 107(1-2): 51-60

sedimentation: Multiple sediment sources and a cellular, non-integrated, longshore drift system; Northwest Florida and Southeast Alabama coast, USA

(Stone, Gregory W., *et al.*) 105(1-4): 141-154

Florida—stratigraphy

Quaternary: Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf

(Locker, Stanley D., *et al.*) 104(1-4): 123-138

folds *see also* faults

foraminifera *see also* foraminifers

foraminifers *see also* foraminifera

foraminifers—biostratigraphy

Holocene: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event

(Schimmelmann, A., *et al.*) 106(3-4): 279-299

Mesozoic: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas

(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

Neogene: Paleontological evidence for early exposure of deep oceanic crust on the Vema fracture zone southern wall (Atlantic Ocean, 10°45'N)

(Aubry, Marie-Pierre, *et al.*) 107(1-2): 1-7

Quaternary: Glacial geology of outer Bjornoyrenna, southwestern Barents Sea

(Saettem, J., *et al.*) 103(1-3): 15-51

— Indications of hydrothermal activity at the Chile Ridge spreading centre

(Marienfeld, P., *et al.*) 105(1-4): 241-252

— Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

foraminifers—occurrence

carbonate sediments: Benthic foraminifera in carbonate facies of a coastal sabkha, Red Sea coast, Saudi Arabia

(Abou Ouf, M.) 104(1-4): 187-191

Formosa *see* Taiwan

fossils *see* appropriate fossil group

foundations *see also* soil mechanics

France—oceanography

marine geology: Marine particle size measurement with a stream-scanning laser system

(Jantschik, R., *et al.*) 106(3-4): 239-250

Gabon—oceanography

continental slope: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

genesis of ore deposits *see* mineral deposits, genesis

geochemistry—geochemical cycle

lithium: Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes

(Martin, Jonathan B., *et al.*) 102(1-4): 281-292

geochemistry—processes

chemical fractionation: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia

(Prasada Rao, C., *et al.*) 103(1-3): 249-272

reduction: Seawater circulation through the flank of the Florida Platform; evidence and implications

(Paull, C. K., *et al.*) 102(1-4): 265-279

solution: Experimental evaluation of the influences of biogenic reworking on carbonate preservation in nearshore sediments

(Green, Mark A., *et al.*) 107(3): 175-181

geochronology *see also* absolute age

geochronology—paleomagnetism

Triassic: Magnetostratigraphy of Triassic sediments, ODP sites 759 and 760, Leg 122, Wombat Plateau, northwest of Australia

(Galbrun, Bruno, *et al.*) 107(4): 293-298

geochronology—racemization

Quaternary: Glacial geology of outer Bjornoyrenna, southwestern Barents Sea

(Saettem, J., *et al.*) 103(1-3): 15-51

geochronology—thermoluminescence

Holocene: Thermoluminescence dating of dunes at Cape St. Lambert, East Kimberleys, northwestern Australia

(Lees, Brian G., *et al.*) 106(1-2): 131-139

geologic time *see* absolute age; geochronology

geomorphology *see also* glacial geology

geomorphology—processes

sedimentation: Frequency dependent cross-shore suspended sediment transport; 1, A non-barred shoreface

(Osborne, Philip D., *et al.*) 106(1-2): 1-24

— Frequency dependent cross-shore suspended sediment transport; 2, A barred shoreface

(Osborne, Philip D., *et al.*) 106(1-2): 25-51

geomorphology—shore features

barrier islands: Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island

(Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168

basins: Basin changes in Jervis Bay, New South Wales; 1894-1988

(Bowyer, J. K.) 105(1-4): 211-224

beaches: Beach systems of the central Netherlands coast; processes, morphology and structural impacts in a storm driven multi-bar system

(Short, Andrew D.) 107(1-2): 103-137

cheniers: The development of a chenier sequence on the Victoria Delta, Joseph Bonaparte Gulf, northern Australia

(Lees, Brian G.) 103(1-3): 215-224

coastal dunes: Thermoluminescence dating of dunes at Cape St. Lambert, East Kimberleys, northwestern Australia

(Lees, Brian G., *et al.*) 106(1-2): 131-139

coastlines: A model of coastal evolution in a transgressed thermokarst topography, Canadian Beaufort Sea

(Ruz, Marie-Helene, *et al.*) 106(3-4): 251-278

- Holocene evolution of the coast of Holland
(Beets, D. J., *et al.*) 103(1-3): 423-443
- deltas*: Quaternary sequence stratigraphy of the Brisbane River delta, Moreton Bay, Australia
(Evans, Kenneth G., *et al.*) 107(1-2): 61-79
- fjords*: Seismic architecture and sedimentation in Northwest Spitsbergen fjords
(Sexton, David J., *et al.*) 103(1-3): 53-68
- landform evolution*: Barriers, barrier platforms, and spillover deposits in St. George's Bay, Newfoundland; paraglacial sedimentation on the flanks of a deep coastal basin
(Shaw, John, *et al.*) 105(1-4): 119-140
- Holocene depocenter migration and sediment accumulation in Delaware Bay; a submerging marginal marine sedimentary basin
(Fletcher, Charles H., III, *et al.*) 103(1-3): 165-183
- shoals*: Largo Bank; a shoreface-connected linear shoal at the Bahia Blanca Estuary entrance, Argentina
(Gomez, Eduardo A., *et al.*) 104(1-4): 193-204
- geophysical methods** *see under* book reviews
- geophysical surveys** *see under* Antarctic Ocean; Arabian Sea; Arctic Ocean; Argentina; Atlantic Ocean; Gulf of Mexico; Japan Sea; Mediterranean Sea; North Sea; Pacific Ocean; Spitsbergen; Tyrrhenian Sea; *see* acoustical surveys *under* geophysical surveys *under* Antarctic Ocean; Arctic Ocean; Argentina; Atlantic Ocean; Mediterranean Sea; Pacific Ocean; Spitsbergen; *see* magnetic surveys *under* geophysical surveys *under* Spitsbergen; *see* seismic surveys *under* geophysical surveys *under* Antarctic Ocean; Arabian Sea; Atlantic Ocean; Gulf of Mexico; Japan Sea; Mediterranean Sea; North Sea; Tyrrhenian Sea; *see* surveys *under* geophysical surveys *under* Atlantic Ocean; Pacific Ocean
- glacial geology** *see also* geomorphology
- glacial geology—glaciation**
 - deglaciation*: The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation
(Mienert, Jurgen, *et al.*) 106(3-4): 217-238
 - Thermoluminescence properties of a deglacial marine sequence from Cumberland Sound, Arctic Canada; sedimentologic and geochronologic implications
(Jennings, Anne E., *et al.*) 103(1-3): 111-123
 - deposition*: Cenozoic prograding sequences of the Antarctic continental margin; a record of glacio-eustatic and tectonic events
(Cooper, Alan K., *et al.*) 102(1-4): 175-213
- glacial extent**: Glacial geology of outer Bjornoyrenna, southwestern Barents Sea
(Saettem, J., *et al.*) 103(1-3): 15-51
- The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores
(Svendsen, John Inge, *et al.*) 104(1-4): 1-17
- glacial geology—glaciers**
 - ice movement*: Seismic architecture and sedimentation in Northwest Spitsbergen fjords
(Sexton, David J., *et al.*) 103(1-3): 53-68
- glacial geology—periglacial features**
 - thermokarst*: A model of coastal evolution in a transgressed thermokarst topography, Canadian Beaufort Sea
(Ruz, Marie-Helene, *et al.*) 106(3-4): 251-278
- glaciation** *see under* glacial geology
- glaciers** *see under* glacial geology
- global tectonics** *see* plate tectonics
- Gondwana** *see under* continental drift
- Great Basin** *see also* the individual states
- Great Britain** *see also* England
- Great Lakes—geomorphology**
 - processes*: Frequency dependent cross-shore suspended sediment transport; 2, A barred shoreface
(Osborne, Philip D., *et al.*) 106(1-2): 25-51
 - Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island
(Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168
- Great Lakes region** *see also* the individual states and provinces
- Great Plains** *see also* the individual states and provinces
- Greater Antilles—tectonophysics**
 - plate tectonics*: Carbonate platforms along the Southeast Bahamas-Hispaniola collision zone
(Mullins, Henry T., *et al.*) 105(1-4): 169-209
- Greece—structural geology**
 - neotectonics*: Recent gravitative mass movements in a highly tectonically active arc system; the Hellenic Arc
(Ferentinos, George) 104(1-4): 93-107
- Greenland—oceanography**
 - continental margin*: The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation
(Mienert, Jurgen, *et al.*) 106(3-4): 217-238
- Guinea—oceanography**
 - continental margin*: The geomorphology of the Southwest Guinea margin; tectonic, volcanic, mass movement and bottom current influences
(Rossi, S., *et al.*) 105(1-4): 225-240
- Gulf Coastal Plain** *see also* the individual states and countries
- Gulf Coastal Plain—oceanography**
 - continental margin*: Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins; Cenozoic Gulf of Mexico case history
(Morton, Robert A., *et al.*) 102(1-4): 239-263
 - sedimentation*: Siliciclastic-to-carbonate transition on the inner shelf embayment, Southwest Florida
(Sussko, Roger J., *et al.*) 107(1-2): 51-60
- Gulf Coastal Plain—stratigraphy**
 - changes of level*: Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins; Cenozoic Gulf of Mexico case history
(Morton, Robert A., *et al.*) 102(1-4): 239-263
 - Neogene*: Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf
(Locker, Stanley D., *et al.*) 104(1-4): 123-138
- Gulf of Mexico—economic geology**
 - oil and gas fields*: Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico
(Kendall, Christopher G. St. C., *et al.*) 102(1-4): 215-238
 - petroleum*: Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins; Cenozoic Gulf of Mexico case history
(Morton, Robert A., *et al.*) 102(1-4): 239-263

Gulf of Mexico—geophysical surveys

seismic surveys: Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf

(Locker, Stanley D., *et al.*) 104(1-4): 123-138

Gulf of Mexico—oceanography

sea water: Seawater circulation through the flank of the Florida Platform; evidence and implications

(Paull, C. K., *et al.*) 102(1-4): 265-279

sedimentation: Siliciclastic-to-carbonate transition on the inner shelf embayment, Southwest Florida

(Sussko, Roger J., *et al.*) 107(1-2): 51-60

Gulf of Mexico—stratigraphy

Cenozoic: Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins; Cenozoic Gulf of Mexico case history

(Morton, Robert A., *et al.*) 102(1-4): 239-263

Mesozoic: Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico

(Kendall, Christopher G. St. C., *et al.*) 102(1-4): 215-238

heavy minerals *see under* marine sediments *under* sediments

Himalayas *see also* the individual countries

Himalayas—stratigraphy

Mesozoic: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas

(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

Holocene *see also under* geochronology *under* Antarctica; Northern Territory; Western Australia; *see also under* stratigraphy *under* Argentina; California; Delaware; Pacific Ocean

hydrogen *see also* deuterium

hydrogen—D/H

sea water: Seawater circulation through the flank of the Florida Platform; evidence and implications

(Paull, C. K., *et al.*) 102(1-4): 265-279

hydrothermal processes *see under* manganese ores *under* mineral deposits, genesis

ice ages *see* glacial geology

igneous rocks *see also* magmas; metamorphic rocks; metasomatism

igneous rocks—ultramafics

ophiolite: Initiation of ophiolite emplacement; a modern example from Okushiri Ridge, Northeast Japan Arc

(Tokuyama, Hidekazu, *et al.*) 103(1-3): 323-334

India—oceanography

continental shelf: A note on the factors controlling the sedimentation rate along the western continental shelf of India

(Manjunatha, B. R., *et al.*) 104(1-4): 219-224

— Clay mineralogy of Visakhapatnam shelf sediments, east coast of India [discussion and reply]

(Durga Prasada Rao, N. V. N., *et al.*) 105(1-4): 305-308

Indian Ocean *see also* Arabian Sea; Persian Gulf; Red Sea

Indian Ocean—geochemistry

organic materials: Nutrient biogeochemical fluxes in the northwestern Indian Ocean

(Mantoura, R. F. C., *et al.*) 104(1-4): 291-292

trace elements: Rare earth elements and neodymium isotopes in the Indian Ocean

(Bertram, C. J., *et al.*) 104(1-4): 289-290

Indian Ocean—oceanography

nodules: Geochemistry of polymetallic nodules from the central Indian Ocean basin

(Valsangkar, A. B., *et al.*) 103(1-3): 361-371

ocean circulation: Nd isotopes in Indian Ocean sediments used as a tracer of supply to the ocean and circulation paths

(Dia, Aline, *et al.*) 103(1-3): 349-359

sediments: Clay mineralogy of Visakhapatnam shelf sediments, east coast of India [discussion and reply]

(Durga Prasada Rao, N. V. N., *et al.*) 105(1-4): 305-308

— Sedimentology of fine-grained turbidites inferred from continuously recorded physical properties data

(Wetzel, Andreas, *et al.*) 104(1-4): 165-178

Indian Ocean—stratigraphy

Mesozoic: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas

(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

Triassic: Magnetostratigraphy of Triassic sediments, ODP sites 759 and 760, Leg 122, Wombat Plateau, northwest of Australia

(Galbrun, Bruno, *et al.*) 107(4): 293-298

Indonesia—oceanography

ocean floors: Three trench endings in eastern Indonesia

(Milsom, John, *et al.*) 104(1-4): 227-241

Indonesia—tectonophysics

plate tectonics: Three trench endings in eastern Indonesia

(Milsom, John, *et al.*) 104(1-4): 227-241

instruments *see under* marine geology; oceanography

intrusions *see also* igneous rocks; metasomatism

Invertebrata *see also* foraminifera

invertebrates *see also* foraminifers; mollusks; radiolarians

Ionian Sea—oceanography

ocean floors: Recent gravitative mass movements in a highly tectonically active arc system; the Hellenic Arc

(Ferentinos, George) 104(1-4): 93-107

isotope dating *see* absolute age

isotopes *see also* absolute age; geochronology

isotopes—C-13/C-12

marine sediments: Early diagenesis of marine organic matter; alteration of the carbon isotopic composition

(McArthur, J. M., *et al.*) 105(1-4): 51-61

isotopes—cesium

Cs-137: Recent environmental changes recorded in anoxic Barsnesfjord sediments; western Norway

(Paetzel, Matthias, *et al.*) 105(1-4): 23-36

isotopes—neodymium

Nd-144/Nd-143: Nd isotopes in Indian Ocean sediments used as a tracer of supply to the ocean and circulation paths

(Dia, Aline, *et al.*) 103(1-3): 349-359

isotopes—O-18/O-16

marine sediments: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin

(Bonifay, Denis, *et al.*) 106(1-2): 107-129

isotopes—sea water

stable isotopes: Seawater circulation through the flank of the Florida Platform; evidence and implications

(Paull, C. K., *et al.*) 102(1-4): 265-279

isotopes—sedimentary rocks

- beachrock*: Stable isotopic composition of carbonate-cemented Recent beachrock along the Mediterranean and the Red Sea coasts of Egypt
(Holail, H., *et al.*) 106(1-2): 141-148

isotopes—sediments

- carbonate sediments*: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272
- Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268
- marine sediments*: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97

isotopes—Sr-87/Sr-86

- marine sediments*: Mineralogical, K-Ar and ⁸⁷Sr/⁸⁶Sr isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean
(Huon, Sylvain, *et al.*) 107(4): 275-282

- pore water*: Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc; clues for emplacement of the seamounts and their relationship to forearc tectonics
(Haggerty, Janet A.) 102(1-4): 293-309

- Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes
(Martin, Jonathan B., *et al.*) 102(1-4): 281-292

isotopes—thorium

- Th-230*: Accumulation rates of surface sediments in the Norwegian-Greenland Sea
(Paetsch, H., *et al.*) 104(1-4): 19-30

Israel—oceanography

- continental margin*: Late Tertiary seismic facies and structures of the Levant passive margin off central Israel, eastern Mediterranean
(Tibor, Gideon, *et al.*) 105(1-4): 253-273

Israel—stratigraphy

- Neogene*: Late Tertiary seismic facies and structures of the Levant passive margin off central Israel, eastern Mediterranean
(Tibor, Gideon, *et al.*) 105(1-4): 253-273

Italy—oceanography

- continental margin*: Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy
(Trincardi, Fabio, *et al.*) 105(1-4): 77-94

- continental slope*: Effect of sea-level variation on upper-slope depositional processes offshore of Tiber Delta, Tyrrhenian Sea, Italy
(Chiocci, Francesco L., *et al.*) 104(1-4): 109-122

- estuaries*: Sedimentation of riverborne material in a shallow shelf sea; Adige River, Adriatic Sea
(Boldrin, A., *et al.*) 103(1-3): 473-485

Italy—stratigraphy

- changes of level*: Effect of sea-level variation on upper-slope depositional processes offshore of Tiber Delta, Tyrrhenian Sea, Italy
(Chiocci, Francesco L., *et al.*) 104(1-4): 109-122

Italy—structural geology

- neotectonics*: Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy
(Trincardi, Fabio, *et al.*) 105(1-4): 77-94

Jamaica—geomorphology

- changes of level*: Dynamic hydrology and diagenesis of a submerged Pleistocene fringing reef, Discovery Bay, Jamaica
(McCullough, M. L., *et al.*) 104(1-4): 139-151

Jamaica—oceanography

- reefs*: Dynamic hydrology and diagenesis of a submerged Pleistocene fringing reef, Discovery Bay, Jamaica
(McCullough, M. L., *et al.*) 104(1-4): 139-151

Japan—oceanography

- sediments*: Sediments and sedimentary processes in Mutsu Bay, Japan; pelletization as the most important mode in depositing argillaceous sediments
(Minoura, Koji, *et al.*) 103(1-3): 487-502

Japan—tectonophysics

- plate tectonics*: Initiation of ophiolite emplacement; a modern example from Okushiri Ridge, Northeast Japan Arc
(Tokuyama, Hidekazu, *et al.*) 103(1-3): 323-334

Japan Sea—geophysical surveys

- seismic surveys*: Initiation of ophiolite emplacement; a modern example from Okushiri Ridge, Northeast Japan Arc
(Tokuyama, Hidekazu, *et al.*) 103(1-3): 323-334

Jurassic *see also under stratigraphy under Atlantic Ocean*

Korea—oceanography

- continental shelf*: Origin and dispersal of Recent clay minerals in the Yellow Sea
(Park, Y. A., *et al.*) 104(1-4): 205-213

lava *see also igneous rocks; magmas*

lead— isotopes

- Pb-210*: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97

lithium—geochemistry

- pore water*: Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes
(Martin, Jonathan B., *et al.*) 102(1-4): 281-292

magmas *see also igneous rocks*

magmas—evolution

- continental margin*: Magmatic-tectonic evolution of a volcanic rifted margin
(Eldholm, Olav) 102(1-4): 43-61

- spreading centers*: The Valu Fa Ridge; the pattern of volcanic activity at a back-arc spreading centre
(Collier, J. S., *et al.*) 104(1-4): 243-263

magnetic surveys *see under geophysical surveys under Spitsbergen*

magnetism of rocks and minerals *see paleomagnetism*

maps *see also under geophysical surveys under Spitsbergen; see also under stratigraphy under North America*

Mariana Islands—oceanography

- ocean floors*: First results of study of sulphur-rich hydrothermal activity from an island-arc environment; Esmeralda Bank in the Mariana Arc
(Stuben, D., *et al.*) 103(1-3): 521-528

marine geology *see also oceanography; see also under oceanography under Atlantic Ocean; Baltic Sea; California; France; Taiwan*

marine geology—instruments

sensors: A fiber optic sensor for monitoring suspended sediment

(Beach, Reginald A., *et al.*) 103(1-3): 513-520

— Notes on the performance of an optical backscatter sensor for cohesive sediments

(Maa, Jerome P. Y., *et al.*) 104(1-4): 215-218

marine geology—methods

laser methods: Marine particle size measurement with a stream-scanning laser system

(Jantschik, R., *et al.*) 106(3-4): 239-250

marine geology—observations

suspended materials: The effect of flocs on optical backscattering measurements of suspended material concentration

(Gibbs, Ronald J., *et al.*) 107(4): 289-291

marine sediments see under sediments**mass movements see under slope stability****Mediterranean region see also the individual countries****Mediterranean Sea see also Adriatic Sea; Aegean Sea; Ionian Sea; Tyrrhenian Sea****Mediterranean Sea—geophysical surveys**

acoustical surveys: Quaternary sedimentary history of Adana, Cilicia and Iskenderun basins; Northeast Mediterranean Sea

(Aksu, A. E., *et al.*) 104(1-4): 55-71

seismic surveys: Late Tertiary seismic facies and structures of the Levant passive margin off central Israel, eastern Mediterranean

(Tibor, Gideon, *et al.*) 105(1-4): 253-273

— Seismic stratigraphy and late Quaternary sediments in inner and mid-shelf areas of eastern Mersin Bay, northeastern Mediterranean Sea

(Ergin, Mustafa, *et al.*) 104(1-4): 73-91

Mediterranean Sea—oceanography

sediments: Organic carbon accumulation in Bannock Basin; evaluating the role of productivity in the formation of eastern Mediterranean sapropels

(Howell, Michael W., *et al.*) 103(1-3): 461-471

Mediterranean Sea—stratigraphy

Quaternary: Quaternary sedimentary history of Adana, Cilicia and Iskenderun basins; Northeast Mediterranean Sea

(Aksu, A. E., *et al.*) 104(1-4): 55-71

— Seismic stratigraphy and late Quaternary sediments in inner and mid-shelf areas of eastern Mersin Bay, northeastern Mediterranean Sea

(Ergin, Mustafa, *et al.*) 104(1-4): 73-91

Mediterranean Sea—tectonophysics—

plate tectonics: Recent gravitative mass movements in a highly tectonically active arc system; the Hellenic Arc

(Ferentinos, George) 104(1-4): 93-107

meetings see symposia**Mesozoic see also under stratigraphy under Gulf of Mexico; Himalayas; Indian Ocean; Nepal; North America; Persian Gulf; symposia; Western Australia****Mesozoic—stratigraphy**

continental drift: Pangaeon divergent margins; historical perspective

(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

Mesozoic—tectonophysics

crust: Evolution of Mesozoic and Cenozoic continental margins

(Meyer, Audrey W., *et al.*) 102(1-4): 1-361

metamorphic rocks see also igneous rocks; metasomatism**metamorphic rocks—geochemistry**

trace elements: Petrology and geochemistry of a dredged clinopyroxenite-dolerite basal complex from the Jan Mayen volcanic province, Norwegian-Greenland Sea

(Bailey, J. C., *et al.*) 105(1-4): 63-76

metamorphism see also metamorphic rocks; metasomatism**metasomatic rocks see also igneous rocks; metamorphic rocks; metasomatism****metasomatic rocks—serpentinite**

petrology: Petrology and geochemistry of a dredged clinopyroxenite-dolerite basal complex from the Jan Mayen volcanic province, Norwegian-Greenland Sea

(Bailey, J. C., *et al.*) 105(1-4): 63-76

metasomatism see also metasomatic rocks**metasomatism—processes**

serpentinization: Petrology and geochemistry of a dredged clinopyroxenite-dolerite basal complex from the Jan Mayen volcanic province, Norwegian-Greenland Sea

(Bailey, J. C., *et al.*) 105(1-4): 63-76

methods see under marine geology; sedimentary petrology**Mexico see also Gulf Coastal Plain****Micronesia see also Mariana Islands****Middle East see also Israel; Turkey****Midwest see also Ohio****mineral deposits, genesis—manganese ores**

hydrothermal processes: Submersible observations of hydrothermal manganese deposits on the Kaikata Seamount, Izu-Ogasawara (Bonin) Arc

(Usui, Akira, *et al.*) 106(3-4): 203-216

mineral deposits, genesis—processes

exhalative processes: First results of study of sulphur-rich hydrothermal activity from an island-arc environment; Esmeralda Bank in the Mariana Arc

(Stuben, D., *et al.*) 103(1-3): 521-528

mineral resources see also the individual deposits**minerals—sheet silicates, clay minerals**

kaolinite: Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications

(Robert, Christian, *et al.*) 103(1-3): 99-110

miospores see under palynomorphs**mollusks—bivalves**

Holocene: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event

(Schimmelmann, A., *et al.*) 106(3-4): 279-299

— Mass mortality of a Holocene *Tagelus plebeius* (Mollusca, Bivalvia) population in the Bahia Blanca Estuary, Argentina

(Farinati, Ester A., *et al.*) 106(3-4): 301-308

mud see under sediments**mud volcanoes see also volcanology****Namibia—oceanography**

continental shelf: Coast-parallel palaeochannels off southern Namibia

(Day, Richard W., *et al.*) 105(1-4): 299-304

- nannofossils** *see under* algal flora
- neodymium— isotopes**
Nd-144/Nd-143: Nd isotopes in Indian Ocean sediments used as a tracer of supply to the ocean and circulation paths (Dia, Aline, *et al.*) 103(1-3): 349-359
- Neogene** *see also under* stratigraphy *under* Atlantic Ocean; Belgium; Gulf Coastal Plain; Israel; Taiwan
- neotectonics** *see also under* structural geology *under* Greece; Italy
- Nepal—stratigraphy**
Mesozoic: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas (Gradstein, Felix M., *et al.*) 102(1-4): 131-173
- Netherlands—geomorphology**
changes of level: Holocene evolution of the coast of Holland (Beets, D. J., *et al.*) 103(1-3): 423-443
shore features: Beach systems of the central Netherlands coast; processes, morphology and structural impacts in a storm driven multi-bar system (Short, Andrew D.) 107(1-2): 103-137
- New England—oceanography**
continental shelf: Late Cretaceous to Miocene phosphatic sediments in the Georges Bank basin, U.S. North Atlantic outer continental shelf (Poppe, L. J., *et al.*) 107(4): 227-238
- New South Wales—geomorphology**
shore features: Basin changes in Jervis Bay, New South Wales; 1894-1988 (Bowyer, J. K.) 105(1-4): 211-224
- New Zealand—oceanography**
sedimentation: Mid-bathyal current scours and sediment drifts adjacent to the Hikurangi deep-sea turbidite channel, eastern New Zealand; evidence from echo character mapping (Barnes, Philip M.) 106(3-4): 169-187
sediments: Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand (Prasada Rao, C., *et al.*) 103(1-3): 273-268
- New Zealand—tectonophysics**
crust: Shallow structure and active tectonism of an offshore continental back-arc spreading system; the Taupo volcanic zone, New Zealand (Wright, Ian C.) 103(1-3): 287-309
- Newfoundland—geomorphology**
changes of level: Barriers, barrier platforms, and spillover deposits in St. George's Bay, Newfoundland; paraglacial sedimentation on the flanks of a deep coastal basin (Shaw, John, *et al.*) 105(1-4): 119-140
- Newfoundland—oceanography**
continental shelf: The western Grand Banks of Newfoundland; transgressive Holocene sedimentation under the combined influence of waves and currents (Dalrymple, Robert W., *et al.*) 105(1-4): 95-118
- Newfoundland—stratigraphy**
changes of level: The western Grand Banks of Newfoundland; transgressive Holocene sedimentation under the combined influence of waves and currents (Dalrymple, Robert W., *et al.*) 105(1-4): 95-118
- nodules—ferromanganese composition**
distribution: Local variations in distribution and composition of ferromanganese nodules in the Clarion-Clipperton nodule province (Skorniyakova, N. S., *et al.*) 103(1-3): 381-405
- nodules—geochemistry**
trace elements: Geochemistry of polymetallic nodules from the central Indian Ocean basin (Valsangkar, A. B., *et al.*) 103(1-3): 361-371
- nodules—observations**
in situ: First in situ studies of nodule distribution and geochemical measurements of associated deep-sea clay (northeastern Pacific Ocean) (Cochonat, P., *et al.*) 103(1-3): 373-380
rhodoliths: Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia (Pujos, M., *et al.*) 104(1-4): 153-164
- North America** *see also* Great Lakes; Gulf Coastal Plain
- North America—stratigraphy**
bibliography: Mesozoic evolution of exotic terranes and marginal seas, western North America (Wilson, Kevin M., *et al.*) 102(1-4): 311-361
maps: Mesozoic evolution of exotic terranes and marginal seas, western North America (Wilson, Kevin M., *et al.*) 102(1-4): 311-361
Mesozoic: Mesozoic evolution of exotic terranes and marginal seas, western North America (Wilson, Kevin M., *et al.*) 102(1-4): 311-361
- North Sea—geophysical surveys**
seismic surveys: The morphology of the top-Tertiary erosion surface in the Belgian sector of the North Sea (Liu, A. C., *et al.*) 105(1-4): 275-284
- North Sea—oceanography**
ocean floors: The morphology of the top-Tertiary erosion surface in the Belgian sector of the North Sea (Liu, A. C., *et al.*) 105(1-4): 275-284
sedimentation: Beach systems of the central Netherlands coast; processes, morphology and structural impacts in a storm driven multi-bar system (Short, Andrew D.) 107(1-2): 103-137
 — Source of sediment and sediment transport on the east coast of England; significant or coincidental phenomena? (Chang, Shih-Chiao, *et al.*) 107(4): 283-288
- North Sea—sedimentary petrology**
diagenesis: Methane-derived carbonate cementation of marine sediments from the Kattegat, Denmark; geochemical and geological evidence (Jorgensen, Niels Oluf) 103(1-3): 1-13
- Northern Hemisphere** *see also* Africa; Arctic Ocean; Atlantic Ocean; North America; Pacific Ocean; USSR
- Northern Territory—geochronology**
Holocene: The development of a chenier sequence on the Victoria Delta, Joseph Bonaparte Gulf, northern Australia (Lees, Brian G.) 103(1-3): 215-224
- Northern Territory—oceanography**
continental shelf: Recent terrigenous sedimentation in Joseph Bonaparte Gulf, northwestern Australia (Lees, Brian G.) 103(1-3): 199-213

Northwest Territories—geochronology

- Quaternary*: Thermoluminescence properties of a deglacial marine sequence from Cumberland Sound, Arctic Canada; sedimentologic and geochronologic implications
(Jennings, Anne E., *et al.*) 103(1-3): 111-123

Northwest Territories—stratigraphy

- changes of level*: A model of coastal evolution in a transgressed thermokarst topography, Canadian Beaufort Sea
(Ruz, Marie-Helene, *et al.*) 106(3-4): 251-278

Norway—oceanography

- continental slope*: Model simulations of tsunamis generated by the Storegga slides
(Harbitz, C. B.) 105(1-4): 1-21
sediments: Recent environmental changes recorded in anoxic Barsnesfjord sediments; western Norway
(Paetzel, Matthias, *et al.*) 105(1-4): 23-36

Nova Scotia—oceanography

- sedimentation*: Frequency dependent cross-shore suspended sediment transport; 1, A non-barred shoreface
(Osborne, Philip D., *et al.*) 106(1-2): 1-24

ocean circulation *see also under oceanography under* Antarctic Ocean; Arabian Sea; Arctic Ocean; Atlantic Ocean; Indian Ocean; Oman; Pacific Ocean

ocean floors *see also under oceanography under* Aegean Sea; Arabian Sea; Atlantic Ocean; Indonesia; Ionian Sea; Mariana Islands; North Sea; Pacific Ocean

ocean waves *see also under oceanography under* Arctic Ocean; Atlantic Ocean; data processing

oceanography—instruments

- sensors*: A fiber optic sensor for monitoring suspended sediment
(Beach, Reginald A., *et al.*) 103(1-3): 513-520

oceanography—symposia

- expeditions*: New horizons in the oceans; the Darwin symposium
(Knill, J. L.) 104(1-4): 225-292

Ohio—geomorphology

- shore features*: Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island
(Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168

oil and gas fields *see also under economic geology under* Gulf of Mexico; Persian Gulf

Oman—oceanography

- ocean circulation*: The monsoon induced upwelling system of the southern coast of Oman
(Savidge, G., *et al.*) 104(1-4): 290-291

Ontario—geomorphology

- processes*: Frequency dependent cross-shore suspended sediment transport; 2, A barred shoreface
(Osborne, Philip D., *et al.*) 106(1-2): 25-51

ooze *see under* marine sediments *under* sediments

ophiolite *see under* ultramafics *under* igneous rocks

organic materials—alteration

- diagenesis*: Early diagenesis of marine organic matter; alteration of the carbon isotopic composition
(McArthur, J. M., *et al.*) 105(1-4): 51-61

organic materials—distribution

- marine sediments*: A critical evaluation of depositional parameters controlling the variability of organic carbon in Arabian Sea sediments
(Paropkari, Anil L., *et al.*) 107(3): 213-226

- Organic carbon distribution in the North Atlantic Ocean during the last glacial maximum
(Coppedge, Melissa L., *et al.*) 105(1-4): 37-50

organic materials—genesis

- sapropel*: Organic carbon accumulation in Bannock Basin; evaluating the role of productivity in the formation of eastern Mediterranean sapropels
(Howell, Michael W., *et al.*) 103(1-3): 461-471

oxygen—O-18/O-16

- beachrock*: Stable isotopic composition of carbonate-cemented Recent beachrock along the Mediterranean and the Red Sea coasts of Egypt
(Holail, H., *et al.*) 106(1-2): 141-148

- carbonate sediments*: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272

- Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268

- marine sediments*: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin
(Bonifay, Denis, *et al.*) 106(1-2): 107-129

- sea water*: Seawater circulation through the flank of the Florida Platform; evidence and implications
(Paull, C. K., *et al.*) 102(1-4): 265-279

Pacific Coast *see also the individual states and provinces*

Pacific Ocean *see also* Japan Sea; Philippine Sea; South China Sea; Yellow Sea

Pacific Ocean—economic geology

- manganese ores*: Submersible observations of hydrothermal manganese deposits on the Kaikata Seamount, Izu-Ogasawara (Bonin) Arc
(Usui, Akira, *et al.*) 106(3-4): 203-216

Pacific Ocean—geochemistry

- lithium*: Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes
(Martin, Jonathan B., *et al.*) 102(1-4): 281-292

- sulfur*: First results of study of sulphur-rich hydrothermal activity from an island-arc environment; Esmeralda Bank in the Mariana Arc
(Stuben, D., *et al.*) 103(1-3): 521-528

- trace elements*: Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc; clues for emplacement of the seamounts and their relationship to forearc tectonics
(Haggerty, Janet A.) 102(1-4): 293-309

Pacific Ocean—geophysical surveys

- acoustical surveys*: Evolution of subtidal sandbanks in Moreton Bay, eastern Australia
(Harris, P. T., *et al.*) 103(1-3): 225-247

- First in situ studies of nodule distribution and geotechnical measurements of associated deep-sea clay (northeastern Pacific Ocean)
(Cochonat, P., *et al.*) 103(1-3): 373-380

- Mid-bathyal current scours and sediment drifts adjacent to the Hikurangi deep-sea turbidite channel, eastern New Zealand; evidence from echo character mapping
(Barnes, Philip M.) 106(3-4): 169-187

- SeaMarc II evidence for the locus of seafloor spreading in the southern Mariana Trough
(Hagen, Rick A., *et al.*) 103(1-3): 311-322
- Three trench endings in eastern Indonesia
(Milsom, John, *et al.*) 104(1-4): 227-241
- surveys*: Geologic setting of hydrothermal activity at the northern Gorda Ridge
(Rona, P. A., *et al.*) 106(3-4): 189-201
- Shallow structure and active tectonism of an offshore continental back-arc spreading system; the Taupo volcanic zone, New Zealand
(Wright, Ian C.) 103(1-3): 287-309
- The Valu Fa Ridge; the pattern of volcanic activity at a back-arc spreading centre
(Collier, J. S., *et al.*) 104(1-4): 243-263
- Pacific Ocean—oceanography**
 - nodules*: Local variations in distribution and composition of ferromanganese nodules in the Clarion-Clipperton nodule province
(Skorniyakova, N. S., *et al.*) 103(1-3): 381-405
 - ocean circulation*: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru
(Schrader, Hans) 107(4): 239-248
 - ocean floors*: Contemporary sedimentary processes in the Monterey Canyon-Fan system
(McHugh, Cecilia M., *et al.*) 107(1-2): 35-50
 - Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc; clues for emplacement of the seamounts and their relationship to forearc tectonics
(Haggerty, Janet A.) 102(1-4): 293-309
 - Mid-bathyal current scours and sediment drifts adjacent to the Hikurangi deep-sea turbidite channel, eastern New Zealand; evidence from echo character mapping
(Barnes, Philip M.) 106(3-4): 169-187
 - The Valu Fa Ridge; the pattern of volcanic activity at a back-arc spreading centre
(Collier, J. S., *et al.*) 104(1-4): 243-263
 - sedimentation*: Recent terrigenous sedimentation in Joseph Bonaparte Gulf, northwestern Australia
(Lees, Brian G.) 103(1-3): 199-213
 - sediments*: Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268
- Pacific Ocean—stratigraphy**
 - Holocene*: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event
(Schimmelmann, A., *et al.*) 106(3-4): 279-299
- Pacific Ocean—tectonophysics**
 - plate tectonics*: Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc; clues for emplacement of the seamounts and their relationship to forearc tectonics
(Haggerty, Janet A.) 102(1-4): 293-309
 - Shallow structure and active tectonism of an offshore continental back-arc spreading system; the Taupo volcanic zone, New Zealand
(Wright, Ian C.) 103(1-3): 287-309
 - sea-floor spreading*: Geologic setting of hydrothermal activity at the northern Gorda Ridge
(Rona, P. A., *et al.*) 106(3-4): 189-201
 - Indications of hydrothermal activity at the Chile Ridge spreading centre
(Marienfeld, P., *et al.*) 105(1-4): 241-252
 - SeaMarc II evidence for the locus of seafloor spreading in the southern Mariana Trough
(Hagen, Rick A., *et al.*) 103(1-3): 311-322
 - The Valu Fa Ridge; the pattern of volcanic activity at a back-arc spreading centre
(Collier, J. S., *et al.*) 104(1-4): 243-263
- Pacific region** *see also* the individual countries
- Pacific region—tectonophysics**
 - plate tectonics*: Mesozoic evolution of exotic terranes and marginal seas, western North America
(Wilson, Kevin M., *et al.*) 102(1-4): 311-361
- paleoclimatology—Cenozoic**
 - Antarctic Ocean*: Significance of clay mineral assemblages in the Antarctic Ocean
(Ehrmann, Werner U., *et al.*) 107(4): 249-273
- paleoclimatology—Holocene**
 - Pacific Ocean*: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event
(Schimmelmann, A., *et al.*) 106(3-4): 279-299
 - Western Australia*: Thermoluminescence dating of dunes at Cape St. Lambert, East Kimberleys, northwestern Australia
(Lees, Brian G., *et al.*) 106(1-2): 131-139
- paleoclimatology—Jurassic**
 - Atlantic Ocean*: Rise and demise of the Bahama-Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway
(Poag, C. Wylie) 102(1-4): 63-130
- paleoclimatology—Paleogene**
 - Atlantic Ocean*: Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications
(Robert, Christian, *et al.*) 103(1-3): 99-110
- paleoclimatology—Quaternary**
 - Antarctic Ocean*: Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea
(Pudsey, Carol J.) 107(1-2): 9-33
 - Atlantic Ocean*: Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin
(Bonifay, Denis, *et al.*) 106(1-2): 107-129
 - Peru*: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru
(Schrader, Hans) 107(4): 239-248
- paleoecology—Holocene**
 - Pacific Ocean*: Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event
(Schimmelmann, A., *et al.*) 106(3-4): 279-299
- paleoecology—mollusks**
 - Holocene*: Mass mortality of a Holocene *Tagelus plebeius* (Mollusca, Bivalvia) population in the Bahia Blanca Estuary, Argentina
(Farinati, Ester A., *et al.*) 106(3-4): 301-308

paleoecology—Quaternary

- Peru*: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru
(Schrader, Hans) 107(4): 239-248

Paleogene *see also under stratigraphy under Antarctica***paleogeography—Holocene**

- Delaware*: Holocene depocenter migration and sediment accumulation in Delaware Bay; a submerging marginal marine sedimentary basin
(Fletcher, Charles H., III, *et al.*) 103(1-3): 165-183

paleogeography—Jurassic

- Atlantic Ocean*: Rise and demise of the Bahama-Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway
(Poag, C. Wylie) 102(1-4): 63-130

paleogeography—Mesozoic

- North America*: Mesozoic evolution of exotic terranes and marginal seas, western North America
(Wilson, Kevin M., *et al.*) 102(1-4): 311-361
Western Australia: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas
(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

paleogeography—Neogene

- Belgium*: The morphology of the top-Tertiary erosion surface in the Belgian sector of the North Sea
(Liu, A. C., *et al.*) 105(1-4): 275-284

paleogeography—Phanerozoic

- global*: Pangaeon divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

paleogeography—Pleistocene

- Denmark*: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic
(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101
Namibia: Coast-parallel palaeochannels off southern Namibia
(Day, Richard W., *et al.*) 105(1-4): 299-304

paleogeography—Quaternary

- Queensland*: Quaternary sequence stratigraphy of the Brisbane River delta, Moreton Bay, Australia
(Evans, Kenneth G., *et al.*) 107(1-2): 61-79
Turkey: Quaternary sedimentary history of Adana, Cilicia and Iskenderun basins; Northeast Mediterranean Sea
(Aksu, A. E., *et al.*) 104(1-4): 55-71

paleomagnetism *see under geochronology***paleomagnetism—Triassic**

- Indian Ocean*: Magnetostratigraphy of Triassic sediments, ODP sites 759 and 760, Leg 122, Wombat Plateau, northwest of Australia
(Galbrun, Bruno, *et al.*) 107(4): 293-298

Paleozoic—stratigraphy

- continental drift*: Pangaeon divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

palynomorphs—miospores

- Pleistocene*: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic
(Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101

periglacial features *see under glacial geology***Persian Gulf—economic geology**

- oil and gas fields*: Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico
(Kendall, Christopher G. St. C., *et al.*) 102(1-4): 215-238

Persian Gulf—stratigraphy

- Mesozoic*: Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico
(Kendall, Christopher G. St. C., *et al.*) 102(1-4): 215-238

Peru—oceanography

- continental slope*: Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes
(Martin, Jonathan B., *et al.*) 102(1-4): 281-292

Peru—stratigraphy

- Quaternary*: Coastal upwelling and atmospheric CO₂ changes over the last 400,000 years; Peru
(Schrader, Hans) 107(4): 239-248

petroleum *see also under economic geology under Gulf of Mexico***Phanerozoic** *see also Cenozoic; Mesozoic; Paleozoic; Tertiary***Phanerozoic—stratigraphy**

- continental drift*: Pangaeon divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

Philippine Sea—tectonophysics

- plate tectonics*: Marine geology in the arc-continent collision zone off southeastern Taiwan; implications for late Neogene evolution of the Coastal Range
(Huang, Chi-Yue, *et al.*) 107(3): 183-212

physical geography *see geomorphology***Plantae** *see also algal flora; palynomorphs***plate tectonics** *see also under tectonophysics under Arabian Sea; Arctic Ocean; Atlantic Ocean; Bahamas; Greater Antilles; Indonesia; Japan; Mediterranean Sea; Pacific Ocean; Pacific region; Philippine Sea; South China Sea***plate tectonics—rifting**

- evolution*: Pangaeon divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

Pleistocene *see also under stratigraphy under Denmark***Pliocene** *see also under stratigraphy under Antarctic Ocean***Pyrenees** *see also France***Quaternary** *see also under geochronology under Bahamas; Northwest Territories; see also under stratigraphy under Antarctic Ocean; Atlantic Ocean; Florida; Mediterranean Sea; Peru; Queensland***Queensland—geomorphology**

- changes of level*: Quaternary sequence stratigraphy of the Brisbane River delta, Moreton Bay, Australia
(Evans, Kenneth G., *et al.*) 107(1-2): 61-79

Queensland—oceanography

- sedimentation*: Evolution of subtidal sandbanks in Moreton Bay, eastern Australia
(Harris, P. T., *et al.*) 103(1-3): 225-247

Queensland—stratigraphy

- Quaternary*: Quaternary sequence stratigraphy of the Brisbane River delta, Moreton Bay, Australia
(Evans, Kenneth G., *et al.*) 107(1-2): 61-79

nearshore environment: Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island (Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168
- sedimentary structures—turbidity current structures**
patterns: Textural and dispersal patterns of thick mud turbidites from the Madeira abyssal plain (Jones, K. P. N., *et al.*) 107(3): 149-173
- sedimentation—coastal sedimentation**
landform evolution: Paraglacial barrier-lagoon development in the late Pleistocene Baltic ice lake, southwestern Baltic (Jensen, Jorn Bo, *et al.*) 107(1-2): 81-101
littoral drift: Source of sediment and sediment transport on the east coast of England; significant or coincidental phenomena? (Chang, Shih-Chiao, *et al.*) 107(4): 283-288
processes: Beach systems of the central Netherlands coast; processes, morphology and structural impacts in a storm driven multi-bar system (Short, Andrew D.) 107(1-2): 103-137
- sedimentation—cyclic processes**
deltaic sedimentation: Quaternary sequence stratigraphy of the Brisbane River delta, Moreton Bay, Australia (Evans, Kenneth G., *et al.*) 107(1-2): 61-79
effects: Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins; Cenozoic Gulf of Mexico case history (Morton, Robert A., *et al.*) 102(1-4): 239-263
— Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico (Kendall, Christopher G. St. C., *et al.*) 102(1-4): 215-238
- glaciomarine sedimentation*: Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea (Pudsey, Carol J.) 107(1-2): 9-33
- progradation*: Effect of sea-level variation on upper-slope depositional processes offshore of Tiber Delta, Tyrrhenian Sea, Italy (Chiocci, Francesco L., *et al.*) 104(1-4): 109-122

sedimentation—environment

glaciomarine environment: The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores

(Svendsen, John Inge, *et al.*) 104(1-4): 1-17

— Thermoluminescence properties of a deglacial marine sequence from Cumberland Sound, Arctic Canada; sedimentologic and geochronologic implications

(Jennings, Anne E., *et al.*) 103(1-3): 111-123

sebkha environment: Benthic foraminifera in carbonate facies of a coastal sabkha, Red Sea coast, Saudi Arabia

(Abou Ouf, M.) 104(1-4): 187-191

sedimentation—estuarine sedimentation

patterns: Sedimentation of riverborne material in a shallow shelf sea; Adige River, Adriatic Sea

(Boldrin, A., *et al.*) 103(1-3): 473-485

turbidity: Bulk properties of intertidal sediments in a muddy, macrotidal estuary

(Stephens, J. A., *et al.*) 103(1-3): 445-460

sedimentation—marine environment

controls: Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications

(Robert, Christian, *et al.*) 103(1-3): 99-110

sedimentation—marine sedimentation

carbonate platforms: Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary foreslopes in the Bahamas

(Grammer, G. Michael, *et al.*) 103(1-3): 125-136

controls: Mineralogy of the silt fraction in surficial sediments from the United States mid-Atlantic shelf, slope and rise

(Poppe, L. J., *et al.*) 103(1-3): 185-197

deep-sea sedimentation: Paleogene-Neogene depositional history of the middle U.S. Atlantic continental rise; mixed turbidite and contourite depositional systems

(Locker, Stanley D., *et al.*) 103(1-3): 137-164

lithofacies: Seismic stratigraphy and late Quaternary sediments in inner and mid-shelf areas of eastern Mersin Bay, northeastern Mediterranean Sea

(Ergin, Mustafa, *et al.*) 104(1-4): 73-91

patterns: Sediment flux patterns in the northeastern Atlantic; variability since the last interglacial

(Cremer, M., *et al.*) 104(1-4): 31-53

progradation: Quaternary sedimentary history of Adana, Cilicia and Iskenderun basins; Northeast Mediterranean Sea

(Aksu, A. E., *et al.*) 104(1-4): 55-71

shelf environment: Origin and dispersal of Recent clay minerals in the Yellow Sea

(Park, Y. A., *et al.*) 104(1-4): 205-213

sedimentation—processes

biochemical sedimentation: Sediments and sedimentary processes in Mutsu Bay, Japan; pelletization as the most important mode in depositing argillaceous sediments

(Minoura, Koji, *et al.*) 103(1-3): 487-502

bioclastic sedimentation: Episodic preservation of pteropod oozes in the deep Northeast Atlantic Ocean; climatic change and hydrothermal activity

(Melkert, Marian J., *et al.*) 103(1-3): 407-422

— Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia

(Pujos, M., *et al.*) 104(1-4): 153-164

deep-sea sedimentation: Contemporary sedimentary processes in the Monterey Canyon-Fan system

(McHugh, Cecilia M., *et al.*) 107(1-2): 35-50

detrital sedimentation: Mineralogical, K-Ar and $^{87}\text{Sr}/^{86}\text{Sr}$ isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean

(Huon, Sylvain, *et al.*) 107(4): 275-282

— Sedimentation in the southern inland seas of the arid zone of the USSR

(Khrustalyov, Yu. P., *et al.*) 103(1-3): 503-512

glaciomarine sedimentation: Barriers, barrier platforms, and spillover deposits in St. George's Bay, Newfoundland; paraglacial sedimentation on the flanks of a deep coastal basin

(Shaw, John, *et al.*) 105(1-4): 119-140

— Cenozoic prograding sequences of the Antarctic continental margin; a record of glacio-eustatic and tectonic events

(Cooper, Alan K., *et al.*) 102(1-4): 175-213

— Glacial geology of outer Bjornoyrenna, southwestern Barents Sea

(Saettem, J., *et al.*) 103(1-3): 15-51

— Seismic architecture and sedimentation in Northwest Spitsbergen fjords

(Sexton, David J., *et al.*) 103(1-3): 53-68

nearshore sedimentation: Basin changes in Jervis Bay, New South Wales; 1894-1988

(Bowyer, J. K.) 105(1-4): 211-224

— Frequency dependent cross-shore suspended sediment transport; 1, A non-barred shoreface

(Osborne, Philip D., *et al.*) 106(1-2): 1-24

— Frequency dependent cross-shore suspended sediment transport; 2, A barred shoreface

(Osborne, Philip D., *et al.*) 106(1-2): 25-51

— Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf

(Locker, Stanley D., *et al.*) 104(1-4): 123-138

— Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island

(Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168

— Siliciclastic-to-carbonate transition on the inner shelf embayment, Southwest Florida

(Sussko, Roger J., *et al.*) 107(1-2): 51-60

— The use of the textural parameters of sand in studying the characteristics and depositional processes of coastal sediments south of Jeddah, Saudi Arabia

(Sagga, Abdulhafiez M. S.) 104(1-4): 179-186

sedimentation—sedimentation rates

biochemical sedimentation: Organic carbon accumulation in Bannock Basin; evaluating the role of productivity in the formation of eastern Mediterranean sapropels

(Howell, Michael W., *et al.*) 103(1-3): 461-471

controls: A note on the factors controlling the sedimentation rate along the western continental shelf of India

(Manjunatha, B. R., *et al.*) 104(1-4): 219-224

deep-sea sedimentation: Local variations in distribution and composition of ferromanganese nodules in the Clarion-Clipperton nodule province

(Skornyakova, N. S., *et al.*) 103(1-3): 381-405

glaciomarine sedimentation: Developing sediment geochronologies for high-latitude continental shelf deposits; a

- radiochemical approach
(Harden, S. L., *et al.*) 103(1-3): 69-97
- Organic carbon distribution in the North Atlantic Ocean during the last glacial maximum
(Coppedge, Melissa L., *et al.*) 105(1-4): 37-50
- The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation
(Mienert, Jurgen, *et al.*) 106(3-4): 217-238
- marine environment*: Rise and demise of the Bahama-Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway
(Poag, C. Wylie) 102(1-4): 63-130
- Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas
(Gradstein, Felix M., *et al.*) 102(1-4): 131-173
- marine sedimentation*: Accumulation rates of surface sediments in the Norwegian-Greenland Sea
(Paetsch, H., *et al.*) 104(1-4): 19-30
- Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin
(Bonifay, Denis, *et al.*) 106(1-2): 107-129
- nearshore sedimentation*: Holocene depocenter migration and sediment accumulation in Delaware Bay; a submerging marginal marine sedimentary basin
(Fletcher, Charles H., III, *et al.*) 103(1-3): 165-183
- Recent environmental changes recorded in anoxic Barnesfjord sediments; western Norway
(Paetzel, Matthias, *et al.*) 105(1-4): 23-36
- pelagic sedimentation*: First in situ studies of nodule distribution and geotechnical measurements of associated deep-sea clay (northeastern Pacific Ocean)
(Cochonat, P., *et al.*) 103(1-3): 373-380
- sedimentation—tectonic controls**
- continental margin*: Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy
(Trincardi, Fabio, *et al.*) 105(1-4): 77-94
- passive margins*: Late Tertiary seismic facies and structures of the Levant passive margin off central Israel, eastern Mediterranean
(Tibor, Gideon, *et al.*) 105(1-4): 253-273
- slope environment*: The geomorphology of the Southwest Guinea margin; tectonic, volcanic, mass movement and bottom current influences
(Rossi, S., *et al.*) 105(1-4): 225-240
- sedimentation—transport**
- marine transport*: Evolution of subtidal sandbanks in Moreton Bay, eastern Australia
(Harris, P. T., *et al.*) 103(1-3): 225-247
- Multiple sediment sources and a cellular, non-integrated, longshore drift system; Northwest Florida and Southeast Alabama coast, USA
(Stone, Gregory W., *et al.*) 105(1-4): 141-154
- Nd isotopes in Indian Ocean sediments used as a tracer of supply to the ocean and circulation paths
(Dia, Aline, *et al.*) 103(1-3): 349-359
- Recent terrigenous sedimentation in Joseph Bonaparte Gulf, northwestern Australia
(Lees, Brian G.) 103(1-3): 199-213
- The western Grand Banks of Newfoundland; transgressive Holocene sedimentation under the combined influence of waves and currents
(Dalrymple, Robert W., *et al.*) 105(1-4): 95-118
- turbidity currents*: Textural and dispersal patterns of thick mud turbidites from the Madeira abyssal plain
(Jones, K. P. N., *et al.*) 107(3): 149-173
- sediments** *see also* sedimentary rocks; sedimentary structures; sedimentation
- sediments—carbonate sediments**
- biofacies*: Benthic foraminifera in carbonate facies of a coastal sabkha, Red Sea coast, Saudi Arabia
(Abou Ouf, M.) 104(1-4): 187-191
- Late Quaternary carbonate sedimentation on the lower Guajira Shelf, Colombia
(Pujos, M., *et al.*) 104(1-4): 153-164
- diagenesis*: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272
- Experimental evaluation of the influences of biogenic reworking on carbonate preservation in nearshore sediments
(Green, Mark A., *et al.*) 107(3): 175-181
- geochemistry*: Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268
- sediments—clay**
- mechanical properties*: First in situ studies of nodule distribution and geotechnical measurements of associated deep-sea clay (northeastern Pacific Ocean)
(Cochonat, P., *et al.*) 103(1-3): 373-380
- sediments—environmental analysis**
- nearshore environment*: Physical processes and sedimentary record of a modern, transgressive, lacustrine barrier island
(Bray, Thomas F., Jr., *et al.*) 105(1-4): 155-168
- sediments—marine sediments**
- clay mineralogy*: Clay mineralogy of Visakhapatnam shelf sediments, east coast of India [discussion and reply]
(Durga Prasada Rao, N. V. N., *et al.*) 105(1-4): 305-308
- clay minerals*: Paleocene and Eocene kaolinite distribution in the South Atlantic and Southern Ocean; Antarctic climatic and paleoceanographic implications
(Robert, Christian, *et al.*) 103(1-3): 99-110
- Significance of clay mineral assemblages in the Antarctic Ocean
(Ehrmann, Werner U., *et al.*) 107(4): 249-273
- composition*: Siliciclastic-to-carbonate transition on the inner shelf embayment, Southwest Florida
(Sussko, Roger J., *et al.*) 107(1-2): 51-60
- diagenesis*: Early diagenesis of marine organic matter; alteration of the carbon isotopic composition
(McArthur, J. M., *et al.*) 105(1-4): 51-61
- Indications of hydrothermal activity at the Chile Ridge spreading centre
(Marienfeld, P., *et al.*) 105(1-4): 241-252
- Methane-derived carbonate cementation of marine sediments from the Kattegat, Denmark; geochemical and geological evidence
(Jorgensen, Niels Oluf) 103(1-3): 1-13

- Reflector "Pc" a prominent feature in the Maud Rise sediment sequence (eastern Weddell Sea); occurrence, regional distribution and implications to silica diagenesis (Bohrmann, Gerhard, *et al.*) 106(1-2): 69-87
- distribution*: Accumulation rates of surface sediments in the Norwegian-Greenland Sea (Paetsch, H., *et al.*) 104(1-4): 19-30
- Basin changes in Jervis Bay, New South Wales; 1894-1988 (Bowyer, J. K.) 105(1-4): 211-224
- Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy (Trincardi, Fabio, *et al.*) 105(1-4): 77-94
- Recent terrigenous sedimentation in Joseph Bonaparte Gulf, northwestern Australia (Lees, Brian G.) 103(1-3): 199-213
- Sediment flux patterns in the northeastern Atlantic; variability since the last interglacial (Cremer, M., *et al.*) 104(1-4): 31-53
- environmental analysis*: Barriers, barrier platforms, and spillover deposits in St. George's Bay, Newfoundland; paraglacial sedimentation on the flanks of a deep coastal basin (Shaw, John, *et al.*) 105(1-4): 119-140
- Extreme climatic conditions recorded in Santa Barbara Basin laminated sediments; the 1835-1840 Macoma event (Schimmelmann, A., *et al.*) 106(3-4): 279-299
- Glacial geology of outer Bjornoyrenna, southwestern Barents Sea (Saettem, J., *et al.*) 103(1-3): 15-51
- Highstand versus lowstand deposition on carbonate platform margins; insight from Quaternary foreslopes in the Bahamas (Grammer, G. Michael, *et al.*) 103(1-3): 125-136
- Middle to late Quaternary sediment flux and post-depositional processes between the continental slope off Gabon and the mid-Guinean margin (Bonifay, Denis, *et al.*) 106(1-2): 107-129
- Mineralogical, K-Ar and $^{87}\text{Sr}/^{86}\text{Sr}$ isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean (Huon, Sylvain, *et al.*) 107(4): 275-282
- Recent environmental changes recorded in anoxic Barnesfjord sediments; western Norway (Paetzel, Matthias, *et al.*) 105(1-4): 23-36
- The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores (Svendsen, John Inge, *et al.*) 104(1-4): 1-17
- geochemical profiles*: Developing sediment geochronologies for high-latitude continental shelf deposits; a radiochemical approach (Harden, S. L., *et al.*) 103(1-3): 69-97
- geochemistry*: Nd isotopes in Indian Ocean sediments used as a tracer of supply to the ocean and circulation paths (Dia, Aline, *et al.*) 103(1-3): 349-359
- Seawater circulation through the flank of the Florida Platform; evidence and implications (Paull, C. K., *et al.*) 102(1-4): 265-279
- grain size*: Late Quaternary changes in Antarctic bottom water velocity inferred from sediment grain size in the northern Weddell Sea (Pudsey, Carol J.) 107(1-2): 9-33
- heavy minerals*: Mineralogy of the silt fraction in surficial sediments from the United States mid-Atlantic shelf, slope and rise (Poppe, L. J., *et al.*) 103(1-3): 185-197
- lithofacies*: Late Tertiary seismic facies and structures of the Levant passive margin off central Israel, eastern Mediterranean (Tibor, Gideon, *et al.*) 105(1-4): 253-273
- Seismic stratigraphy and late Quaternary sediments in inner and mid-shelf areas of eastern Mersin Bay, northeastern Mediterranean Sea (Ergin, Mustafa, *et al.*) 104(1-4): 73-91
- lithostratigraphy*: Neogene to Recent stratigraphy and depositional regimes of the Northwest Florida inner continental shelf (Locker, Stanley D., *et al.*) 104(1-4): 123-138
- ooze*: Episodic preservation of pteropod oozes in the deep Northeast Atlantic Ocean; climatic change and hydrothermal activity (Melkert, Marian J., *et al.*) 103(1-3): 407-422
- organic materials*: A critical evaluation of depositional parameters controlling the variability of organic carbon in Arabian Sea sediments (Paropkari, Anil L., *et al.*) 107(3): 213-226
- Organic carbon accumulation in Bannock Basin; evaluating the role of productivity in the formation of eastern Mediterranean sapropels (Howell, Michael W., *et al.*) 103(1-3): 461-471
- Organic carbon distribution in the North Atlantic Ocean during the last glacial maximum (Coppedge, Melissa L., *et al.*) 105(1-4): 37-50
- paleomagnetism*: Magnetostratigraphy of Triassic sediments, ODP sites 759 and 760, Leg 122, Wombat Plateau, northwest of Australia (Galbrun, Bruno, *et al.*) 107(4): 293-298
- phosphate composition*: Late Cretaceous to Miocene phosphatic sediments in the Georges Bank basin, U.S. North Atlantic outer continental shelf (Poppe, L. J., *et al.*) 107(4): 227-238
- physical properties*: Erratum; Parasound echosounding; comparison of analogue and digital echosounder records and physical properties of sediments from the equatorial South Atlantic (Rostek, Frauke, *et al.*) 103(1-3): 541-542
- The East Greenland continental margin (65°N) since the last deglaciation; changes in seafloor properties and ocean circulation (Mienert, Jurgen, *et al.*) 106(3-4): 217-238
- pore water*: Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes (Martin, Jonathan B., *et al.*) 102(1-4): 281-292
- provenance*: Multiple sediment sources and a cellular, non-integrated, longshore drift system; Northwest Florida and Southeast Alabama coast, USA (Stone, Gregory W., *et al.*) 105(1-4): 141-154
- Origin and dispersal of Recent clay minerals in the Yellow Sea (Park, Y. A., *et al.*) 104(1-4): 205-213
- textures*: The western Grand Banks of Newfoundland; transgressive Holocene sedimentation under the combined influence of waves and currents (Dalrymple, Robert W., *et al.*) 105(1-4): 95-118

- thermoluminescence*: Thermoluminescence properties of a deglacial marine sequence from Cumberland Sound, Arctic Canada; sedimentologic and geochronologic implications (Jennings, Anne E., *et al.*) 103(1-3): 111-123
- thickness*: The geomorphology of the Southwest Guinea margin; tectonic, volcanic, mass movement and bottom current influences (Rossi, S., *et al.*) 105(1-4): 225-240
- turbidite*: Paleogene-Neogene depositional history of the middle U.S. Atlantic continental rise; mixed turbidite and contourite depositional systems (Locker, Stanley D., *et al.*) 103(1-3): 137-164
- Sedimentology of fine-grained turbidites inferred from continuously recorded physical properties data (Wetzel, Andreas, *et al.*) 104(1-4): 165-178
- Textural and dispersal patterns of thick mud turbidites from the Madeira abyssal plain (Jones, K. P. N., *et al.*) 107(3): 149-173
- sediments—mud**
- physical properties*: Bulk properties of intertidal sediments in a muddy, macrotidal estuary (Stephens, J. A., *et al.*) 103(1-3): 445-460
- Predicting erosion resistance of muds (Dade, W. B., *et al.*) 105(1-4): 285-297
- textures*: Sediments and sedimentary processes in Mutsu Bay, Japan; pelletization as the most important mode in depositing argillaceous sediments (Minoura, Koji, *et al.*) 103(1-3): 487-502
- sediments—sand**
- distribution*: Evolution of subtidal sandbanks in Moreton Bay, eastern Australia (Harris, P. T., *et al.*) 103(1-3): 225-247
- provenance*: Source of sediment and sediment transport on the east coast of England; significant or coincidental phenomena? (Chang, Shih-Chiao, *et al.*) 107(4): 283-288
- textures*: The use of the textural parameters of sand in studying the characteristics and depositional processes of coastal sediments south of Jeddah, Saudi Arabia (Sagga, Abdulhafiez M. S.) 104(1-4): 179-186
- sediments—textures**
- grain size*: Comparing sieve and sedimentation balance analysis of beach, lake and eolian sediments using log-hyperbolic parameters (Lund-Hansen, Lars Chresten, *et al.*) 107(1-2): 139-147
- Sedimentation of riverborne material in a shallow shelf sea; Adige River, Adriatic Sea (Boldrin, A., *et al.*) 103(1-3): 473-485
- seismic surveys see under geophysical surveys under** Antarctic Ocean; Arabian Sea; Atlantic Ocean; Gulf of Mexico; Japan Sea; Mediterranean Sea; North Sea; Tyrrhenian Sea
- Shandong—oceanography**
- continental shelf*: Origin and dispersal of Recent clay minerals in the Yellow Sea (Park, Y. A., *et al.*) 104(1-4): 205-213
- shore features see under geomorphology**
- slope stability see also geomorphology**
- slope stability—mass movements**
- submarine environment*: Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy (Trincardi, Fabio, *et al.*) 105(1-4): 77-94
- Model simulations of tsunamis generated by the Storegga slides (Harbitz, C. B.) 105(1-4): 1-21
- soil mechanics—materials, properties**
- mud*: Predicting erosion resistance of muds (Dade, W. B., *et al.*) 105(1-4): 285-297
- South America see also** Argentina; Colombia; Peru
- South China Sea—tectonophysics**
- plate tectonics*: Marine geology in the arc-continent collision zone off southeastern Taiwan; implications for late Neogene evolution of the Coastal Range (Huang, Chi-Yue, *et al.*) 107(3): 183-212
- South-West Africa see** Namibia
- Southern Hemisphere see also** Africa; Antarctic Ocean; Antarctica; Atlantic Ocean; Indian Ocean; Pacific Ocean
- Southern U.S. see also** Alabama
- Soviet Union see** USSR
- Spitsbergen—geophysical surveys**
- acoustical surveys*: Seismic architecture and sedimentation in Northwest Spitsbergen fjords (Sexton, David J., *et al.*) 103(1-3): 53-68
- magnetic surveys*: Preliminary interpretation of aeromagnetic data from Spitsbergen, Svalbard Archipelago (76°-79°N); implications for structure of the basement (Skilbrei, Jan Reidar) 106(1-2): 53-68
- maps*: Preliminary interpretation of aeromagnetic data from Spitsbergen, Svalbard Archipelago (76°-79°N); implications for structure of the basement (Skilbrei, Jan Reidar) 106(1-2): 53-68
- Spitsbergen—oceanography**
- continental shelf*: The late Weichselian glacial maximum on western Spitsbergen inferred from offshore sediment cores (Svendsen, John Inge, *et al.*) 104(1-4): 1-17
- Spitsbergen—tectonophysics**
- crust*: Preliminary interpretation of aeromagnetic data from Spitsbergen, Svalbard Archipelago (76°-79°N); implications for structure of the basement (Skilbrei, Jan Reidar) 106(1-2): 53-68
- strontium—Sr-87/Sr-86**
- marine sediments*: Mineralogical, K-Ar and ⁸⁷Sr/⁸⁶Sr isotope studies of Holocene and Late Glacial sediments in a deep-sea core from the Northeast Atlantic Ocean (Huon, Sylvain, *et al.*) 107(4): 275-282
- pore water*: Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc; clues for emplacement of the seamounts and their relationship to forearc tectonics (Haggerty, Janet A.) 102(1-4): 293-309
- Lithium; sources in pore fluids of Peru slope sediments and implications for oceanic fluxes (Martin, Jonathan B., *et al.*) 102(1-4): 281-292
- sea water*: Seawater circulation through the flank of the Florida Platform; evidence and implications (Paull, C. K., *et al.*) 102(1-4): 265-279
- symposia—oceanography**
- research*: New horizons in the oceans; the Darwin symposium (Knill, J. L.) 104(1-4): 225-292
- symposia—stratigraphy**
- Mesozoic*: Evolution of Mesozoic and Cenozoic continental margins (Meyer, Audrey W., *et al.*) 102(1-4): 1-361

Taiwan—oceanography

- marine geology*: Marine geology in the arc-continent collision zone off southeastern Taiwan; implications for late Neogene evolution of the Coastal Range
(Huang, Chi-Yue, *et al.*) 107(3): 183-212

Taiwan—stratigraphy

- Neogene*: Marine geology in the arc-continent collision zone off southeastern Taiwan; implications for late Neogene evolution of the Coastal Range
(Huang, Chi-Yue, *et al.*) 107(3): 183-212

Tasman Sea—oceanography

- sedimentation*: Basin changes in Jervis Bay, New South Wales; 1894-1988
(Bowyer, J. K.) 105(1-4): 211-224
sediments: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272
— Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268

Tasmania—oceanography

- sediments*: Carbonate minerals, major and minor elements and oxygen and carbon isotopes and their variation with water depth in cool, temperate carbonates, western Tasmania, Australia
(Prasada Rao, C., *et al.*) 103(1-3): 249-272
— Oxygen and carbon isotope fields for temperate shelf carbonates from Tasmania and New Zealand
(Prasada Rao, C., *et al.*) 103(1-3): 273-268

tectonics *see also* faults; plate tectonics**Tertiary** *see also* under stratigraphy under Atlantic Ocean**Tertiary—stratigraphy**

- continental drift*: Pangaeon divergent margins; historical perspective
(Uchupi, Elazar, *et al.*) 102(1-4): 1-28

thermoluminescence *see* under geochronology**thorium— isotopes**

- Th-230*: Accumulation rates of surface sediments in the Norwegian-Greenland Sea
(Paetsch, H., *et al.*) 104(1-4): 19-30

trace elements *see* under geochemistry under Indian Ocean; metamorphic rocks; nodules; Pacific Ocean**Triassic** *see also* under stratigraphy under Indian Ocean**tritium** *see also* deuterium; hydrogen**turbidity current structures** *see* under sedimentary structures**turbidity currents** *see* under transport under sedimentation**Turkey—oceanography**

- continental shelf*: Quaternary sedimentary history of Adana, Cilicia and Iskenderun basins; Northeast Mediterranean Sea
(Aksu, A. E., *et al.*) 104(1-4): 55-71
— Seismic stratigraphy and late Quaternary sediments in inner and mid-shelf areas of eastern Mersin Bay, northeastern Mediterranean Sea
(Ergin, Mustafa, *et al.*) 104(1-4): 73-91

Turkey—stratigraphy

- changes of level*: Quaternary sedimentary history of Adana,

Cilicia and Iskenderun basins; Northeast Mediterranean Sea

(Aksu, A. E., *et al.*) 104(1-4): 55-71

Tyrrhenian Sea—geophysical surveys

- seismic surveys*: Collapse and flow of lowstand shelf-margin deposits; an example from the eastern Tyrrhenian Sea, Italy
(Trincardi, Fabio, *et al.*) 105(1-4): 77-94
— Effect of sea-level variation on upper-slope depositional processes offshore of Tiber Delta, Tyrrhenian Sea, Italy
(Chiocci, Francesco L., *et al.*) 104(1-4): 109-122

United Kingdom *see also* England**United States** *see also* Alabama; California; Delaware; Eastern U.S.; Florida; New England; Ohio**USSR—geomorphology**

- processes*: Sedimentation in the southern inland seas of the arid zone of the USSR
(Khrustalyov, Yu. P., *et al.*) 103(1-3): 503-512

volcanism *see* under volcanology**volcanology—volcanism**

- continental margin*: Magmatic-tectonic evolution of a volcanic rifted margin
(Eldholm, Olav) 102(1-4): 43-61
spreading centers: The Valu Fa Ridge; the pattern of volcanic activity at a back-arc spreading centre
(Collier, J. S., *et al.*) 104(1-4): 243-263

West Indies *see also* Bahamas; Greater Antilles; Jamaica**West Pacific Ocean Islands—economic geology**

- manganese ores*: Submersible observations of hydrothermal manganese deposits on the Kaikata Seamount, Izu-Ogasawara (Bonin) Arc
(Usui, Akira, *et al.*) 106(3-4): 203-216

Western Australia—geochronology

- Holocene*: The development of a chenier sequence on the Victoria Delta, Joseph Bonaparte Gulf, northern Australia
(Lees, Brian G.) 103(1-3): 215-224
— Thermoluminescence dating of dunes at Cape St. Lambert, East Kimberleys, northwestern Australia
(Lees, Brian G., *et al.*) 106(1-2): 131-139

Western Australia—oceanography

- continental margin*: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas
(Gradstein, Felix M., *et al.*) 102(1-4): 131-173
continental shelf: Recent terrigenous sedimentation in Joseph Bonaparte Gulf, northwestern Australia
(Lees, Brian G.) 103(1-3): 199-213

Western Australia—stratigraphy

- Mesozoic*: Stratigraphic evolution of Mesozoic continental margin and oceanic sequences; Northwest Australia and northern Himalayas
(Gradstein, Felix M., *et al.*) 102(1-4): 131-173

Western Hemisphere *see also* Atlantic Ocean; North America; Pacific Ocean**Western U.S.** *see also* California**Yellow Sea—oceanography**

- sedimentation*: Origin and dispersal of Recent clay minerals in the Yellow Sea
(Park, Y. A., *et al.*) 104(1-4): 205-213
